

# TC007 Industrial Turbidimeter

## FEATURES

- ISO 7027 compliant
- High performance LED light source
- Real time inline measurement
- Suitable for hazardous area use
- Alarm, 4-20 mA and Modbus TCP communications
- Supports QuickCal verification & calibration

The Kemtrak TC007 is an industrial fiber optic coupled turbidimeter for high resolution, real time, inline concentration measurement. Measurement capability is from ultra clear liquids to high concentration slurries and emulsions.

A high performance LED light source with robust fiber optics assures drift free operation with exceptionally high precision. Industrial-grade measurement cells and probes with scratch-resistant sapphire windows contain no electronics or moving parts, making them ideal for high-temperature and hazardous area use. All wetted materials are FDA compliant, assuring compatibility in sanitary processes.

For ultra precise measurement of low turbidities (0.01 – 1000 NTU) in accordance with ISO 7027, our measurement cells will compensate for sample color and fouling of the optical windows in real time to assure reliable and trouble free operation. High concentration suspended solids (exceeding 80% solids) are reliably measured by a precision backscatter probe that will not go blind at high optical densities.

QuickCal validation and calibration accessories simplify the procedure of instrument calibration and verification by removing the time-consuming and hazardous task of handling liquid standards.

**Kemtrak TC007 Measurement Range**

Standard features include 16 separate linearization/calibration tables for multiple product operation, remote zeroing, automatic cleaning cycle operation and advanced signal filtering. An on-board graphical internet based configuration utility allows remote operation, calibration, verification, and data trending using a standard PC.

All Kemtrak products are designed to meet the most demanding application specifications and are made from the highest quality materials to ensure exceptionally long life and the highest reliability.
